Dear Ms. Heese:

I think it a shame that the company which has created more millionaires in the history of the world is being hounded by our own government.

It's obvious to me that Microsoft doesn't completely monopolize the computer industry, because we have used Apple computers for the past several years. Infact, we currently have, and use, both a Perform and a G-3.

Leave Microsoft alone & get on with finding & prosecuting terrorists.

Respectfully,

Lucinda Sexton
